

CEA-SPRINGER AWARD TO THE BEST PHD THESIS IN BIOENGINEERING

The Bioengineering Group of the Spanish Committee in Automatic Control organizes this award to recognize and to stimulate research results obtained in the Bioengineering and Biomedical Engineering fields by PhD students who have finished their PhD Thesis between January 1st, 2020 and December 31st, 2020. This is an annual award and it will be regulated according to the rules described in the corresponding rules document.

The PhD Thesis must be about some topic related with the Bioengineering or Biomedical Engineering fields, and at least one the supervisors must be partner of the Spanish Committee of Automatic Control and member of the Bioengineering thematic group.

The Theses presented in this call cannot be presented in the Award call of other thematic groups of the Spanish Committee of Automatic Control.

The winner should give a talk about the PhD Thesis results at the meeting of the Bioengineering group that will be held in the Spanish National Conference during the same year of the award call. The award will be supported by Springer and by the Spanish National Committee of Automatic Control, and will consist in the following:

- Accrediting certificate of the Spanish National Committee of Automatic Control.
- Publication of a paper at the Spanish Journal RIAI about the thesis results.
- Publication of the thesis at the Springer Theses Series.
- Cash prize equivalent to 500€, awarded by Springer.

The candidates accept the Springer terms related with Thesis publication criteria that are described in the following link:

<http://www.springer.com/series/8790?detailsPage=free>

The following documents provide the complete award rules as well as the corresponding forms for candidates to present the corresponding documentation.

Candidate should upload a compressed file with the following documentation:

- Form, provided as Annex I, formally presenting the candidate to the award.
- List of contributions arisen from the PhD. This list should be elaborated on the basis of the form provided as Annex II.
- Copy of the minutes of the PhD defence session by showing the qualification
- PhD dissertation (PDF document)
- PhD Abstract and letter explaining the relationship with the activity and thematic field of Bioengineering.

The forms Annex I and Annex II can be found at the web page of the CEA Bioengineering thematic group

The deadline for the submission of applications is the 15th of July 2021.
